Mr. Lambert
Web Page Design Assignment

Presidential Candidate Web Page

For this assignment, you are being asked to use the HTML and CSS skills that you've acquired to this point to develop a web page for one of the presidential candidates and his running mate. The target audience for the page should be young voters, those between the ages of 18 and 25.

At a minimum your page should include the following content:

- Short biographical sketches of the candidate and his running mate
- The candidate's position on at least 3 key issues
- Photos of the candidate and his running mate
- A link to the official campaign web site
- Factors that make the candidate the "candidate of choice" for the 18 to 25 age group.

You should produce a well thought out and well developed web page. You should validate your page at <http://validator.w3.org> prior to submitting it.
